

**Jasmine Snowsill, *Senior GIS Technician and Developer:***

Jasmine is our Senior GIS Tech and Developer providing clever and efficient ***Georeferenced*** siteplans since 2009. She has a Bachelor of Science in Geography and project experience throughout New Zealand as well as in Victoria and New South Wales where her work included the collection of seismic data and servicing of seismograph stations.

Major GIS projects completed have included development and supply of the revised Fault Hazard Overlay through Nelson City and a sediment supply review in Invercargill. She has skills in analysis and interpretation of field data using various specialist software packages, including assisting in the development and testing of new software. She has advanced knowledge and experience in Microsoft Office programs and ESRI Arcmap GIS software.
