

**Tommy D Liang, GEO Technician:**

Tommy was a technology manager in China. After graduating from Guangzhou Light Industry Technical School in 1981 Tommy worked at the Equipment and Infrastructure Glass Works Company for nine years. Initially working as a machinery technician, he became a Machinery Assistant Engineer in 1989. He then worked at the Mechanical Equipment design Office of a Battery Manufacturing Company for two years.

After moving to New Zealand, he was a Machine operator for five years working in the Food Processing and Plastic Bag Industries for two different Companies in Auckland. In 2005 he moved to Nelson and worked at New Zealand King Salmon for ten years, handling and grading fish. He was the first to grade the new brand 'Ora King' fish and ensure high quality produce for the customer. 'Ora King' is the top brand superior quality fish produce in New Zealand King Salmon.

Since February 2017 he has worked at Geo-Logic Limited as a geo technician preparing computer logs (Scalas, log sheets using Publisher and Excel) and performing Scala and other field tests. He recently has used ESRI Arcmap GIS and completed a small residential dwelling using 'Sketchup'. He likes travel and music and is interested in natural sciences, classical and modern building architecture and design.
